REPORT OF THE TRUSTEES.

CITY HOSPITAL, BOSTON, Dec. 31, 1885.

To the Honorable City Council:—

The Trustees of the City Hospital, in compliance with the Ordinances, respectfully present herewith their Annual Report:—

Number of patients remaining in the Hospital	
April 30, 1885	321

Admitted during eight-twelfths years:—

Medical	1,815	
Surgical	1,336	
Ophthalmic	78	
	<hr/>	3,229

Treated during eight-twelfths years	3,550
Discharged	2,865
Died	363
	<hr/>
	3,228

Remaining in Hospital Dec. 31, 1885	322
---	-----

Largest number in Hospital at any one time	365
Smallest number in Hospital at any one time	265
Daily average number of patients	315+
Average length of stay of each patient (days)	21.76+

Number of patients treated in the Out-patient Department, classified according to their diseases:—

Medical diseases	1,801
Surgical "	3,557
Diseases of the Eye	1,094
" " Ear	274
" " Skin	560
" of Women	301
" " Nervous System	298
" " the Throat	386
	<hr/>
Total	8,271

Number of visits to the Hospital, classified according to diseases : —

Medical diseases	3,683
Surgical “	16,390
Diseases of the Eye	6,365
“ “ Ear	1,177
“ “ Skin	1,503
“ of Women	1,099
“ “ Nervous System	1,205
“ “ the Throat	1,440
Surgical out-patients treated at accident-room, and not elsewhere included	597
	<hr/> 33,459

The report of the Superintendent and Resident Physician, presented herewith, contains, besides other information, a statement of the expenditures of the fiscal year, and is accompanied by the reports of the medical staff. These reports give in detail the number of patients treated in the Hospital, and the number treated in the Out-patient departments during the year, with classified statements of their diseases and the results of treatment.

The whole number of patients in the Hospital during the year was 3,550, and they were under treatment an average of 21.76 days each, making a total of 77,035 days, or 11,005 weeks. The entire cost of maintaining the Hospital during the year was at the rate of \$10.93+ per week. \$120,375 63

But of the patients enumerated above, 1,574
paid for 3,945 weeks' board 29,718 91

Leaving, therefore, the sum of \$90,656 72
as the cost to the city of treating 1,976 non-paying patients, for a total of 7,060 weeks. But after deducting money received from pay-patients, stock on hand (extraordinary expenses, such as alterations and additions, complete renovations of old wards, new furniture and fixtures, etc., not included in the maintenance for this year), and averaging the net cost of maintaining the Hospital for the year, among all the patients treated, we find the *average cost to the city, of board for each patient, was \$7.64+ per week.*

The report of the Superintendent explains in detail the expenditures made during the year in maintaining the Hospital.

The annual reports of the Hospital during the last twelve years have included the days between May 1st and April 30th,

inclusive, of the following year. To conform to the changes made necessary by the new City Charter the Hospital year closes Dec. 31st. The report herewith presented includes the time between May 1st and Dec. 31st, inclusive, 1885, eight months only; and comparisons of all statistics of this with previous Hospital years must be made on the basis of eight-twelfths of a year for this Hospital year.

The number of persons under treatment during the year has been 3,550, which is *pro rata* the largest of any Hospital year. A study of the movement of the population of the Hospital year by year will show a very steadily increasing ratio in the number treated.

During the past year the largest number of patients in the Hospital at any one time was 365; the smallest number at any one time 265. The average length of stay was $21\frac{7}{10}$ days. Last year, 6,072 applicants were examined for admission; this year 4,286. During the year 736 applicants were denied admission, and the causes of rejections will be found in the Superintendent's report.

The total expenditure of the Hospital year has been \$120,375.63. This sum is in the aggregate larger than last year for the same period, but the average number of patients has been larger, and the months include that portion of the year when the more extensive repairs are made, which is an important item of the year's expenditures. If, however, we deduct the income and extraordinary expenses, *the average net cost per patient each week this year is \$7.64+ against \$8.39 last year.* While the decrease in cost is considerable, it is more apparent than real, as we have received a larger income this year from paying-patients than during any previous year. The claims made by the City of Boston against the Commonwealth have been urged for several years, and though the sum allowed by legislation is less than one-half the actual cost to the city, the income allowed by the State authorities partially recompenses, and is appreciable in our income. It has further been the policy of the Trustees to encourage payment of board in reasonable sums by patients of moderate means, to discourage pauperism and the indiscriminate use of "free" beds.

To show the benefits which have accrued to the city by this policy, the following table will show the income from paying patients for the past ten years:—

May 1, 1875, to April 30, 1876	.	.	.	\$1,276 28
" 1876, " " 1877	.	.	.	5,160 07
" 1877, " " 1878	.	.	.	8,136 86
" 1878, " " 1879	.	.	.	7,820 42
" 1879, " " 1880	.	.	.	8,366 11

May 1, 1880, to April 30, 1881	.	.	.	\$10,571 83
" 1881, " " 1882	.	.	.	13,231 29
" 1882, " " 1883	.	.	.	13,504 44
" 1883, " " 1884	.	.	.	13,766 07
" 1884, " " 1885	.	.	.	15,476 78
" 1885, " Dec. 31, 1885 ($\frac{8}{12}$ years)	.	.	.	29,718 91

Previous to 1877 the accommodations for private patients were very limited; but the new buildings made available that year afforded special accommodations, for which special prices were charged. This led gradually to the encouragement of paying of board by those in the wards, until at the present time careful inquiry is made into the claims and means of all patients admitted. Patients are frequently admitted asserting they are too poor to pay for medical attendance, who on scrutiny are found to be amply able to pay at least the cost of their board and care. Patients have been admitted as described who have been found to own unencumbered real estate amounting to \$20,000; and in one instance a landlord occupied a "free" bed for several months while his tenants came semi-monthly on visiting days to pay their rent.

To the poor sick, having a residence within the city, the doors should be freely open if the case is within the proper province of the Hospital to treat. But if a patient has no claim upon the city, or if found to be able to pay, the patient, or those responsible for him, should refund the Hospital for assistance rendered, often of a kind that he could not possibly afford or obtain at his own home.

Various causes conduce yearly to increase the cost of support. The large demand upon us for admissions compels a selection of patients who are at the outset very ill, or who demand a greater expenditure of labor and material. This has been alluded to in previous reports; but the fact becomes more conspicuous each year, and will bear emphasizing in considering cost of support. The outfit in materials for treatment, especially in surgical patients, is most liberal, as has been requested by the Surgical Staff, in order to keep pace with improved methods and treatment in vogue in first-class European and a few American hospitals.

The dietary is larger than at any previous time in the history of the Hospital, particularly in the medical services. If the Hospital is subject to comparative criticism in this particular, it would be on the score of too much liberality rather than too great economy. This is apparent from the almost entire disappearance of complaints both as to quality, quantity, and the cooking of the diet, and also by the liberal expenditure in subsistence supplies. While every hospital of

good repute should spare nothing essential for the recovery of the sick under its care, a careful consideration of what is proper and necessary should not be lost sight of by the Hospital Staff in the expenditures in a large public hospital.

The expenditures for the year further include a continuance of the plan of thoroughly renovating the Hospital, part by part, in order that within a limited circle of time every part of the Hospital premises may undergo scrupulous cleansing. Several wards have been treated in the same manner as in previous years. The wood-work has been repaired, plaster torn away and replaced, pent-up places exposed and cleansed, ceilings colored, painting renewed, floors relaid or planed, and made impervious to moisture. The administration building, so long neglected by reason of pressing work elsewhere, has this year been repaired and painted internally in its corridors, stair-ways, and most of the rooms.

During the year the Nurses' Home has been completed, furnished, and occupied. It has more than fulfilled the expectations of the Trustees, and during the short time it has been occupied has verified the good policy that led to its recommendation and construction. The nurses have not only enjoyed better health, but much has been accomplished to make their daily monotonous routine pleasant and in a way homelike. The withdrawal of the nurses from the Hospital wards has given us much needed room for the isolation of very sick or dying patients. It has also enabled us to receive many cases that previously we were compelled to reject.

Since the occupation of the Nurses' Home out of 1,838 applicants only 17 have been rejected for want of accommodations, and those were patients having contagious diseases.

Since the opening of the Home the Trustees gratefully acknowledge the gift of a new Chickering piano for the nurses' parlor, from a lady; and also five hundred dollars in money from a physician, a former House officer, for the purchase of a library.

While the Trustees are gratified by the things accomplished during the past Hospital year, they feel it their duty to again most urgently call the attention of the City Council to our one great and pressing necessity—the want of proper accommodations for the treatment of out-patients. This has been repeatedly recommended in previous reports (see fifteenth report, 1879, p. 21; — sixteenth report, 1880, p. 22; — eighteenth report, 1885, p. 8; — nineteenth report, 1883, p. 9; — twentieth report, 1884, pp. 8, 26; — twenty-first report, 1884–85, pp. 7, 22.) We beg to quote from the Trustees' report of last year. —

The Out-patient Departments show an increase in numbers treated and visits made. These departments are constantly growing in value. Many applicants are not seriously ill, and do not require continuous nursing, or grave surgical operation, and yet they are incapacitated from work. The advice and treatment rendered put them in a condition to maintain themselves by returning to work, and thus *pro rata* accomplishes the same result as treatment in the Hospital. It is a matter of great economy, because successful treatment as out-patients saves to the city the vastly increased cost of admitting them to the wards. It thus becomes as important a part of our duty to the sick poor that this service should be as well conducted as any department of the Hospital. The tables in the Superintendent's report are interesting, showing the work accomplished in these departments; and also proving, by comparison with previous reports, the rapidly increasing demands. During the last year 41,802 visits were made to the various departments for out-patients. This is the largest number ever treated, and is fifty-five per cent. more than the number treated ten years ago. There are more departments; additional physicians and surgeons are necessary, because the work is more extended, and more thorough methods are adopted for treatment and relief. The accommodations, however, remain the same, wholly inadequate, badly arranged, and inconvenient in many ways. The complaints of the staff, and our own observation, bring this matter frequently before us. The money required for an absolute and ready relief is not large, and is small in comparison to the benefits rendered to the poor of the city. We recommend a special appropriation for this object.

The number of visits made this year by out-patients was 44,419 against 41,802 last year. This does not include a considerable number who were referred to other dispensaries and Out-patient departments, because we could not properly treat them; nor to others who have voluntarily gone away untreated because our insufficient facilities would not permit their treatment, except at great cost of time. The City Hospital suffers greatly in comparison because the Massachusetts General Hospital, the Boston Dispensary, and other out-patient departments have now commodious and model new buildings. It is, moreover, not only a hardship to the sick poor who come here as out-patients, but a serious inconvenience to the physicians and surgeons who give their time and services to the city. This much-needed improvement should receive the early attention of the City Government.

The Mayor and members of the City Council who visited the Hospital in December had every opportunity of inspecting our present cramped and inadequate quarters. It was apparent to all present that our request was both reasonable and proper. We pray, in behalf of the large numbers of sick poor who come here for treatment, as also for the physicians who give their time and skill, that no ordinary objections as to ways and means may obstruct the fulfilment of this request.

There are but few changes to record in the Medical and Surgical Staff.

S. G. Webber, M.D., Visiting Physician to Department for Diseases of the Nervous System, has resigned, by reason of his appointment as Superintendent of the Adams Nervine Asylum. The vacancy has been filled by the appointment

of Chas. F. Folsom, M.D., Physician to Out-patients' Department for Diseases of the Nervous System.

Dr. Folsom's vacancy has been in turn filled by the assistant, Philip C. Knapp, Jr., M.D.

The thanks of the Trustees are due to the members of the Medical and Surgical Staff for their valuable services, which have contributed in a large measure to the successes of the year.

It is a pleasure to publicly recognize the many acts of interest and kindness shown by a large number of friends toward the sick in many and unostentatious ways.

Many gifts, some large and many small, have contributed much to the comfort and pleasure of the patients. Flowers, fruit, and reading matter have been specially abundant.

Thanks are due to the clergymen, hospital readers, and singers for their devoted attentions to the sick.

Special mention should be made of the long and patient labors of Miss Linda Richards, Superintendent of Nurses, who has resigned her position to enter upon a similar work of training native women in Japan in nursing. Much of the success of the Training School, especially in its difficult transition from the old *régime* to its present status, is due to Miss Richards.

The work of the year has been large, and we are happy to record no calamity, dissension, or unfortunate incident.

The Trustees desire to express their appreciation of the excellent work of the Superintendent, Dr. Rowe, and the officers associated with him.

T. J. DACEY,
President.

REPORT OF THE SUPERINTENDENT AND RESIDENT PHYSICIAN.

CITY HOSPITAL, Dec. 31, 1885.

To the Board of Trustees:—

GENTLEMEN, — I have the honor to present herewith my Annual Report of the Hospital for the year, May 1st to Dec. 31st, inclusive.

The following table shows the number of patients who have each year applied for admission, and been treated at the Hospital:—

	Patients examined for admission.	Patients admitted.	Patients accidentally injured.	Number of out-patients treated.
From June 1, 1864, to December 31, 1864.....	703	475	129	371
From January 1, 1865, to December 31, 1865.....	1,451	1,066	242	1,143
From January 1, 1866, to Dec. 31, 1866.....	1,749	1,432	345	3,324
From January 1, 1867, to December 31, 1867.....	1,913	1,534	328	7,015
From January 1, 1868, to Dec. 31, 1868.....	2,729	2,078	417	8,794
From January 1, 1869, to April 30, 1870.....	4,632	3,054	482	11,791
From May 1, 1870, to April 30, 1871.....	3,977	2,396	525	8,899
From May 1, 1871, to April 30, 1872.....	4,387	2,873	565	8,947
From May 1, 1872, to April 30, 1873.....	4,326	3,304	660	7,526
From May 1, 1873, to April 30, 1874.....	4,250	3,201	804	9,272
From May 1, 1874, to April 30, 1875.....	4,652	3,424	756	8,732
From May 1, 1875, to April 30, 1876.....	4,434	3,180	689	9,413
From May 1, 1876, to April 30, 1877.....	4,713	3,580	663	8,526
From May 1, 1877, to April 30, 1878.....	5,068	4,034	604	9,658
From May 1, 1878, to April 30, 1879.....	5,285	4,323	734	10,419
From May 1, 1879, to April 30, 1880.....	5,444	3,995	505	10,309
From May 1, 1880, to April 30, 1881.....	5,781	4,418	553	10,605
From May 1, 1881, to April 30, 1882.....	5,842	4,107	567	12,035
From May 1, 1882, to April 30, 1883.....	5,991	4,423	666	12,174
From May 1, 1883, to April 30, 1884.....	6,152	4,780	531	14,241
From May 1, 1884, to April 30, 1885.....	6,072	4,831	676	12,005
From May 1, 1885, to Dec. 31, 1885.....	3,965	3,229	562	8,271
Totals	93,516	69,737	12,003	193,470

The number of patients, classified according to their diseases, who visited the Hospital for advice and treatment in the Out-patient Departments, was as follows :—

Medical diseases, under charge of Drs. Rotch, F. H. Williams, and Buckingham	1,801
Surgical diseases, under charge of Drs. Gavin, Burrell, and Watson	3,557
Diseases of the Eye, under charge of Drs. H. W. Williams and Wadsworth	1,094
Diseases of the Ear, under charge of Dr. J. O. Green and Dr. F. H. Brown	274
Diseases of the Skin, under charge of Drs. Wigglesworth and Tilden	560
Diseases of Women, under charge of Drs. Boardman and C. M. Green	301
Diseases of the Nervous System, under charge of Drs. Folsom, Prince, and Knapp	298
Diseases of the Throat, under charge of Drs. DeBlois and Hooper	386
Total	8,271

NUMBER OF VISITS MADE BY OUT-PATIENTS TO THE HOSPITAL.

Year.	Month.	Medical.	Surgical.	Eye.	Ear.	Skin.	Women.	Nervous.	Throat.	Total.

Income from Paying Patients... ..	29,718 91	
	40,243 72	
Net cost of maintaining Hospital from May 1 to Dec. 31, 1885.....	\$84,180 30	

In considering the statistics and finances of the year here recorded it should be kept in mind that this report is for $\frac{8}{12}$ of a year, May 1 to Dec. 31, inclusive, 1885. This has become necessary as the new City Charter requires the

Annual Report to be made to Dec. 31, instead of April 30, as heretofore.

The foregoing statistics show that the total expenditure during $\frac{8}{12}$ year has been \$120,375.63. This sum is reduced to \$114,461.39 by deducting from the total expenditure the cost of alterations and additions, renovating four wards, new appliances, etc., which are not chargeable to the current expenses of the Hospital. This amount includes every expenditure, and gives a cost of \$10.93 per week for each patient. If, however, we allow for the difference in stock at the beginning and close of the year, the income from paying patients, and the extraordinary expenses, etc., not chargeable to the maintenance for this year, we have as a *net cost* to the city of running the Hospital, \$84,180.30, or *per capita* for each patient treated during the year \$7.64 per week.

The largest number of patients on any one day was 365, against 357 last year; the smallest was 265, against 260 last year. The daily average was 315+, which is 9 more than last year, and 29 more than two years ago. The average length of stay was the same as last year.

The number of patients admitted with accidental injuries was 562. Of all patients admitted, 140 died within 48 hours after admission. The rate of mortality was $10\frac{2}{10}$ per cent. If from the total number of deaths we deduct those brought to the Hospital in a dying condition, the annual mortality is reduced from $10\frac{2}{10}$ to $6\frac{5}{10}$ per cent.

The income from paying patients has been \$29,718.91. This is nearly double the amount received in any previous year, and is due largely to the payment of past claims against the State of Massachusetts for the board of State cases.

During the eight months of the year the benefits of the Hospital have been received by 8,271 persons. Of 3,965 persons examined for admission 736 have been rejected; a proportionately smaller number than last year. The causes of rejection will be found in a classified table elsewhere. Our enlarged accommodations (rooms formerly occupied by nurses) have enabled us to admit many persons who would otherwise have been rejected. Out of 1,836 applicants rejected since the occupation of the Nurses' Home, only 17 have been for want of accommodations, and those were patients with contagious diseases. The important subject of the admission or rejection of an applicant was dwelt upon at some length in the report of last year.

The finances of the year present no special feature. The appropriation was ample for our requirements, as it antici-

pated an increase in population, and was asked to meet this expectation. The net cost for each patient has been only \$7.64+, which is \$0.75 less than last year. This reduction is explained by the increase in receipts from paying patients.

The capacity of the Hospital is now 425 beds. The classification of sexes and the numerous diseases will not, however, under the most favorable circumstances, allow the number to exceed 400 on any one day. When the new wards for contagious diseases are completed 60 more beds will be added, making a total capacity of 485 beds.

Further work has been accomplished in general repairs about the Hospital. Ward H has undergone the same thorough renovating as the other older wards, during the previous two or three years. This ward, for many years forbidding and undesirable in comparison with others, is now cheerful and in excellent sanitary condition. A new floor has been laid, and is the best in the Hospital. The administration building has been painted and repaired internally. Its large corridors and stair-ways, all offices, and most of its rooms, have been colored and painted, furniture renovated or replaced, and the whole appearance improved. A large amount of repairing has been done in numerous places about the Hospital which cannot be here enumerated, but which adds greatly to the completeness of so large an establishment.

The building for Out-patient Departments yet remains the great blemish and the most disagreeable feature of our Hospital establishment. Inadequate in room, unhealthy as a habitation, unsightly in its internal appearance, inconvenient for use, and wanting in the commonplace features of ventilation, heating, and sanitary provisions, it is the cause of more complaints than from all other quarters. A department of the city charities which comes so near to the poor people of Boston, and which with suitable arrangement might be made the means of relief to nearly 50,000 persons annually, surely deserves to be placed upon a good working basis from the city treasury. I especially appeal to your Board to renew most earnestly the request for means to carry on this branch of the Hospital in a proper manner worthy of its importance. The devices to which we resort in doing our work, under existing conditions, in some of the departments, is such that wonder has been expressed that the public has not formulated complaints. In view of repeated and urgent appeals, the management is at least relieved of any responsibility that may be attached to such grievances, should any arise.

The Nurses' Home during the past year has been practically completed, furnished, and, since September, has been

occupied. There were unexpected delays incident to the details in completing so large a building; but these were fully recompensed by the completion of many desirable appointments. The building has been plainly but pleasantly furnished. The parlors present a home-like and attractive appearance. Open fireplaces assist in the heating and ventilation, and add to the cheerfulness. A piano has been presented by a generous lady, and a library of five hundred books fresh from the booksellers' shelves has been provided by the generosity of a physician who was formerly a house-officer at the Hospital. Each nurse's room has an iron bedstead of pretty design, and comfortable; a capacious bureau with mirror, wash-stand, table, chairs, and book-shelves, all in ash, designed and made for this special use. The method of heating and ventilating has been found to be satisfactory. The short distance from the Hospital requires nurses to take a walk in the open air; and this has proved an advantage to their health, for it enforces exercise in many cases previously neglected. The health of the nurses has been better, and they have enjoyed comfort, quietness, and relaxation from the many depressing effects of the Hospital atmosphere. This change has likewise done much to relieve the frictions incident to seventy nurses living in many and unsuitable parts of the Hospital buildings. This radical improvement has proved of incalculable benefit, and we are already satisfied that the beneficial results have warranted all that has been expended. The Trustees may be congratulated that we have the largest, and, as a whole, the best Nurses' Home in connection with any training-school in this country, if not in Europe.

The Training-School is now in its ninth year. At the beginning of the year there were sixty-two nurses. During the eight months represented by this report thirteen have completed their two years' course of training, and received their diplomas; of these one remains as Night Supervisor of Nurses. One graduate has left to take charge of another hospital. Four pupils have resigned for lack of strength or some physical disability, and two have been dismissed for cause.

Two former pupils and twenty-five probationers have been admitted. The assistant to the Superintendent of Nurses and seven head nurses are graduates of our school; there are also seven assistant nurses acting as head nurses, fifty-three assistants, and two probationers.

The class recitations and lectures have been carried on as usual. The Superintendent of Nurses and her assistants have given 140 formal class recitations in the manuals and text-books, and twenty-four classes in *massage*.

The following lectures have been given to the whole school by the medical and surgical staff:—

Five by Dr. Gay; surgical dressings and appliances;

Two by Dr. Lyman; nursing in gynæcological lectures;

Three by Dr. Rotch; children, their care in health and disease;

Two by Dr. Burrell; surgical emergencies;

Three by Dr. Post; surgical demonstrations;

One by Dr. Draper; common-sense in the sick-room;—making a total of sixteen lectures during the eight months. These statistics of instruction are practically the work of only four months last preceeding Dec. 31. We have not found it desirable to continue lectures, and very much class-work during the four summer months, except some elementary work among the junior nurses. The increase in the number of nurses has come about gradually by reason of the increase of the number of Hospital beds to 425. The present number of nurses in the Training-School, supplemented by twenty male nurses, and twelve ward-maids, is found to be fully adequate to doing the work of nursing demanded by our average population.

It is to be regretted that Miss Linda Richards, Superintendent of Nurses, felt it her duty to resign in order to transfer her labors to Japan, and assist in the organization of training the native women of that country in nursing. To Miss Richards, in a large degree, is due the credit of bringing our Training-School to its present efficient condition. Its inception was not without resistance, and from that time to the present many difficulties have been encountered. Her labors are associated with the school's success, and grateful recognition of this is conspicuously deserved. The position left by her is at present filled by Miss Lucy L. Drown, who is a graduate of the school, has been for some time the Assistant Superintendent of Nurses, and is familiar with the work and the Hospital.

I make grateful mention of kindly interest and attention to our sick, shown by the Hospital visitors and readers; by the clergymen, and many others. Generous gifts of flowers, reading matter, fruit, clothing, and numerous useful things, have been contributed.

The acknowledgment of my sincere thanks is due to the gentlemen of the medical and surgical staff for many official and personal courtesies, and their coöperation and sympathy has been as heretofore of much assistance.

My thanks are due the officers, nurses and employés of the Hospital, for their faithful services, and loyalty to its interests.

In presenting this my seventh annual report to the Trustees, I am in the largest degree grateful and indebted to them for their continued indulgence and official support.

I have the honor to be

Your obedient servant,

G. H. M. ROWE,

Superintendent and Resident Physician.

BEQUESTS.

GOODNOW FUND. — ELISHA GOODNOW, of South Boston, who died the year 1851, and whose will is dated July 12, 1849, bequeathed to the city "all the rest and residue of his estate, real and personal, not otherwise disposed of," for the purpose of establishing, in the Eleventh or Twelfth Wards of the city, a Hospital for the sick; one-half of said funds to be applied for the establishment and maintenance of free beds, which should always be at the disposal and under the control of the Officers of the Government of said Hospital for the time being. Under this will the city came into possession of certain real estate situated on Cross street, which has been disposed of, and has produced the sum of \$16,500, which has been invested in City of Boston Six per cent. Stock. Also a lot of land on Third street, South Boston, containing 6,683½ feet, which was disposed of in 1867 for \$4,623.25, of which \$4,000 has been invested in City of Boston Five per cent. Stock, and the balance (\$623.25) remained in the City Treasury at interest until it amounted to \$1,000, and was invested in a City of Boston Six per cent. Currency Note. The \$10,000 deposited by the Executors of Mr. Goodnow, June 22, 1852, with the Massachusetts Hospital Life Insurance Company, the interest upon which is to be paid to the widow, will, upon her decease, be distributed as follows: —

\$500 to the Penitent Females' Refuge.

\$5,000 to City of Boston; income to be expended for the relief of sick and infirm persons.

\$4,500 to be added to the fund heretofore provided for the support of free beds in the City Hospital.

NICHOLS FUND. — LAWRENCE NICHOLS, who died in September, 1862, made the following bequest to the city: "I give to the City of Boston, towards the establishment and endowment of a City Hospital, in case such Hospital shall have been established at the time of my decease, the sum of one thousand dollars." And in case such Hospital should not have been established by the city at the time of his decease, he directed the same amount to be deposited with the Massachusetts Hospital Life Insurance Company, and suffered to accumulate, by the addition of interest, until such a Hospital should be established.

The executor of the will, Wm. Perkins, Esq., has paid into the treasury nine hundred and thirty-seven dollars and

twenty-five cents (\$937.25), being the amount devised, less the *Internal Revenue Tax* on the same, and \$530.50, as one of the "*residuary legatees in the United States*," from the surplus remaining undisposed of. The \$937.25, with the accumulated interest thereon, has been invested in a certificate of City Stock for \$1,000. The balance (\$530.50) remained at interest until it amounted to \$1,000, and was invested in a City of Boston Six per cent. Currency Note.

NORCROSS FUND. — 1868, January 1. The trustees received the sum of two thousand dollars from Hon. OTIS NORCROSS, as the foundation of a fund for the benefit of patients leaving the Hospital poor and destitute of proper clothing. The principal sum is invested in a City of Boston interest-bearing note, to be deposited with the City Auditor, the interest of which is to be collected annually or oftener, and paid over to the President of the Board of Trustees, for the time being, of the City Hospital, to be by him expended at his discretion for the benefit and temporary assistance of those patients who are in his judgment deserving, and who are destitute of proper clothing in which to leave the Hospital, and having no means of procuring it.

The Ordinance in relation to the City Hospital, Ordinances of 1876, Sect. 9, page 433, provides that said scrip shall be deposited with the Auditor of Accounts, who shall receive the interest as the same shall become due thereon, and add it to the moneys which shall have been appropriated for the use of the Hospital.

HOUSE RULES.

WITH RULES FOR ADMISSION AND DISCHARGES AND GOVERNMENT OF PATIENTS; ALSO RULES FOR VISITORS.

HOUSE RULES.

All employés shall be in their respective places during the hours of duty.

The doors and gates of the Hospital will be closed at 10 o'clock P.M., at which time all inmates shall be quiet, and all not on duty shall be in their rooms.

A record shall be kept of all persons entering the Hospital between the hours of 10 P.M. and 7.30 A.M.

No employés shall be absent from the Hospital, except as permitted by special rules or by the Superintendent.

The use of tobacco, wine, and intoxicating liquors is prohibited within the Hospital, unless prescribed by a Physician or Surgeon.

All profane and obscene language, loud talking, and incivility are prohibited.

All employés shall observe such further rules and directions for their conduct as may from time to time be established.

ADMISSION OF PATIENTS.

Applications for admission of patients may be made at the Hospital on each day of the week, Sunday excepted, between 9 and 12 o'clock A.M.

Whenever able the patient shall apply in person. When not able to appear in person, on application made by a friend, the patient may be visited at his residence.

Any Trustee, or either of the Physicians or Surgeons in attendance, may, in case of emergency, send a patient in the first instance to the Hospital by written permit.

Persons accidentally wounded, or otherwise disabled or injured, shall be received at all hours.

Permits for admission shall be subject to the approval of the Visiting Committee, and the Committee shall, except as above, have power at any time to require the Superintendent to report to them the names of applicants before admitting them, and may dismiss any patient whom they think improperly admitted, or change the terms of admission.

Patients may be admitted by the Trustees to the privileges of the Hospital at such rates of board as the Trustees may,

from time to time determine, payment for such board being secured by the friends of the patients or by the authorities of the city or town to which the patients belong.

Whenever, in the opinion of the Trustees, the circumstances of the patient will warrant it, the whole or a part of the board shall be paid. If separate apartments, or articles not usually furnished at the Hospital, are provided, such payment shall be made therefor as the Trustees shall deem reasonable.

No person having acute venereal disease, or alcoholism, shall be admitted except as a paying patient.

No person shall be admitted to the Hospital whose case is judged to be incurable, unless there be urgent symptoms, which are deemed capable of being relieved.

DISCHARGE OF PATIENTS.

Patients shall be discharged by the Superintendent as before provided.

Patients discharged on the recommendation of the Physicians or Surgeons shall be provided with a certificate, stating their condition at the time of discharge, whether cured, relieved, or not relieved, which certificate shall be signed by the Superintendent.

Whenever a patient is removed from the Hospital without the approval of the Superintendent, a written statement to that effect shall be required from any person assuming the responsibility of the removal.

In case of the decease of a patient the Superintendent shall sign the death-certificate. He shall also state the time and cause of death, the disposition made of the body, whether delivered to friends or buried from the Hospital, in which latter case he shall mention the place of interment.

The body of any person dying at the Hospital shall not be delivered without a written receipt from the parties taking the same.

GOVERNMENT OF PATIENTS.

Patients shall implicitly observe all the rules of the Hospital.

Patients shall be in their proper places in the wards during the visit of the Physicians and Surgeons, and always by 7.30 o'clock P.M., unless specially excused by the Superintendent.

Such free patients as are able shall assist in nursing, and in such other services as may be reasonably required of them.

No patient shall leave the Hospital grounds without a pass from the Superintendent, nor his ward, without the consent of the nurse in charge.

No patient shall purchase, or cause to be purchased for him, any article of food whatsoever, nor any other article, without the consent of the Superintendent.

Profane and obscene language, loud talking, and incivility are prohibited.

Patients may be visited by clergymen of their own selection, and any wish for the performance of a particular religious rite shall be indulged when practicable.

Complaints, for whatever cause, may be made to the Superintendent or Visiting Committee, and when reasonable shall be by them reported to the Trustees.

VISITORS.

No person shall visit any part of the premises, except on business, or at such times as may be fixed for the reception of visitors, without the permission of the Superintendent, or of some one of the Trustees.

On Monday, Tuesday, Thursday, and Saturday of each week, from 2 to 3 clock P.M., friends may be permitted to visit patients, though no patient shall receive more than two visitors on the same day. In all cases, however, the Trustees or Superintendent may exercise discretionary powers as to excluding or admitting visitors.

All visitors shall leave the Hospital when the bell rings at the expiration of the visiting hour.

No visitor shall take any meal in the Hospital, or pass the night therein, without permission from the Superintendent or one of the Trustees.

No visitor shall be allowed to give any article of food or drink to a patient, unless by permission of the nurse; and any article sent to a patient shall be left with the Superintendent.

THE BOSTON CITY HOSPITAL TRAINING-SCHOOL FOR NURSES.

The Trustees of the Boston City Hospital are prepared to give a two years' course of training to women desirous of becoming professional nurses.

Those wishing to receive such a course of instruction must apply to the Superintendent of the City Hospital, Boston.

The most desirable age for candidates is from twenty-three to thirty-five years; they must be in sound health, and must send with their application a certificate from two responsible persons (one a physician) as to their good character and good health. Upon the recommendation of the Superintendent of the Hospital, and the approval of the Trustees, they will be received for one month on probation. During this month they are boarded and lodged, and have their laundry work done at the Hospital, but receive no compensation.

The Superintendent of Nurses has charge of the Training-School, under the authority of the Superintendent of the Hospital and of the Board of Trustees, and the nurses are subject to the rules of the Hospital. Their fitness for the work, and the propriety of retaining or dismissing them at the end of the month of trial, are determined by the authorities in charge of the school, under the direction of the Trustees; and the same authorities can, in like manner, discharge them at any time, in case of misconduct or inefficiency. They reside in the Hospital, and serve as assistant nurses in its wards.

All nurses are required to be sober, honest, truthful, trustworthy, punctual, quiet, orderly, cleanly, neat, patient, kind, and cheerful.

COURSE OF TRAINING.

Those fulfilling the conditions of the probationary month are accepted as pupils. They must sign a written agreement to remain at school for two years, and to conform to the rules.

The instruction includes:—

1. The dressing of blisters, burns, sores, and wounds, and preparation and applying of fomentations, poultices, and minor dressings.

2. Cupping, leeching, and subsequent treatment.

3. The administering of enemas, and use of the female catheter.

4. The applying of friction to the body and extremities in the best method.

5. The management of helpless patients in bed, in moving, changing bed and body linen, giving baths, keeping patients warm or cool, prevention and dressing bed-sores, managing position, etc., and in feeding.

6. The making of bandages and rollers, preparation of splints, etc., and bandaging.

7. The making of beds and changing sheets, etc., with patients in bed.

8. The cooking, preparing, and serving of food and delicacies for the sick.

They are also given some instruction in the best practical methods of supplying fresh air, warming and ventilating sick-rooms in a proper manner, and are taught to take proper care of rooms and wards; in keeping all utensils perfectly clean and disinfected, etc.; to observe the sick accurately in regard to the state of the secretions, expectorations, pulse, breathing, skin, temperature, eruptions, sleep, mental condition as to delirium, stupor, etc., condition of wounds, appetite, effect of diet or of stimulants and medicine, and the managing of convalescents.

The instruction is given mainly by the Superintendent of the Training-School and by the head nurses. Lectures, recitations, and demonstrations also take place at stated periods by the Hospital staff and House Officers. Examinations, chiefly upon practical points, will take place from time to time.

The pupils are employed as assistant nurses in the wards of the Hospital, and are paid ten dollars (\$10) per month during the first year, and fourteen dollars (\$14) per month during the second year, for their clothing and personal expenses. This sum is in nowise intended as wages, it being considered that their education during this time is a full equivalent for their services.

They are required to wear at all times, while on duty in the wards, the Training-School uniform dress.

When the full term of two years is completed, the nurses thus trained receive (after final examinations) diplomas certifying to the regular course of training, their knowledge of nursing, and their ability.

The right is reserved to terminate the connection of any nurse or pupil with the school for any reason which may be deemed sufficient.

A blank form will be furnished to applicants to be filled in

with answers to the following questions in the candidate's own handwriting, and sent to the *Superintendent of City Hospital, Boston, Mass.*

QUESTIONS TO BE ANSWERED BY CANDIDATE.

1. Christian name in full.
2. Are you a single woman or widow?
3. Your present occupation or employment.
4. Age last birthday, and date and place of birth.
5. Height. Weight.
6. In what school or schools educated, and in what place?
7. Are you strong and healthy? Have you always been so?
8. Are your sight and hearing perfect?
9. Have you any physical defects?
10. Have you any tendency to pulmonary complaint?
11. If a widow, have you children? How many? Their ages? How are they provided for?
12. Are you otherwise free from domestic responsibility, so that you are not liable to be called away?
13. Where (if any) was your last situation? How long were you in it?
14. The names in full and addresses of two persons not of your own kindred to be referred to. State how long each has known you. If previously employed, one of these must be the last employer.

Having read and clearly understanding the foregoing conditions and regulations, I declare the above statement to be correct.

Signed,

Candidate.

Date.

Present Address.
